

Air cooling arrangement for AVEL built-in TV in a Sauna / Steam Room.

43"-75"

For TVs with a diagonal from 43" to 75"

The ventilation duct must have forced ventilation and supply cold air from outside the room to the lower part of the TV installation box, centrally, while removing the heated air from the upper part.

The ventilation duct cross-section is to be equivalent to at least 100 mm diameter tube.
